

## Agenda 21 - UN

Private property rights are under assault in communities and rural areas across the nation as state and federal authorities move to enforce new planning development programs, particularly under the labels of Sustainable Development or Local Visioning. Darrell would withdraw the federal government from such international, sovereignty destroying legislation and begin the process of handing control of their lives and property back to the local people

## Pro-Life Stance

If you've ever said that you will never vote for someone who is not pro-life, or who supports abortion, and if you are really serious about that statement, then you only have one choice in this election. **Darrell is the only candidate of any party that is 100% pro-life or even close to it.** He would veto funding for Planned Parenthood, confirm the validity of the 10th amendment, and convince Congress to take away Supreme Court jurisdiction over such matters.

## What is the Constitution Party?

[www.constitutionparty.com](http://www.constitutionparty.com)

Organized since 1992, the Constitution Party is a coalition of like-minded state parties, ready to re-establish the Rule of Law as defined in America's founding documents. The Party has been preparing for such a time as this - a time when the foundations upon which the American nation was built are being shaken to their very core.

Now is the time for all Americans who believe in the Founding Principles to join our ranks, roll up your sleeves, and fight for the Liberty which our ancestors fought so valiantly to obtain for their posterity.

## THE CONSTITUTION

**Charting  
America's course  
as a Free &  
Independent Nation**

[Castle2016.com](http://Castle2016.com)

*"It is the nature of the State to seek dominance over the population. Freedom will not ultimately remain intact if we leave it unattended. America needs forward thinking leaders - leaders who do not apologize to the politically-correct demands of the thought police. Self-hatred and appeasement only foster more disrespect. We must find a way to chart our own course in the world as free and independent people"*

*Darrell Castle*

America is facing the most difficult election year in its history. The response of the voters to the choices placed before them will decide the future for generations. This decision is just as crucial as that placed before the colonists. They were asked to choose between tyranny and liberty - between the political status quo of their time and a chance for a new beginning based on the idea of liberty and limited government. These are the keys to peace and tranquility in public life.

Once again the American people must decide who they are. Are they people of principle, or cowards in the face of Hillary? This year ethical people only have one choice. That choice is a Christian, pro-life, preserver of the Constitution and what most Conservatives say they want. Will they have the gumption to vote their conscience or fall back in lack of faith?

- ★ Born in Tennessee, USA
- ★ Marine Corps Combat Officer in Viet Nam.
- ★ Bachelor degrees in both Political Science and History from Eastern Tennessee State University
- ★ Juris Doctorate from Memphis State University (now the University of Memphis)
- ★ Attorney in Memphis since 1984.

## Adherence to the Constitution

The Constitution is the charter of liberty for the American Republic. It is much more than just a piece of paper or just a legal document. It is evidence of the grand design the founders left us and it secures the rights that God granted to us.

## Withdrawal of the United States from the United Nations

Many of the inherent rights in the U.S. Constitution are perceived to be superseded by the United Nations Charter, including the right of self-defense. We must free ourselves from the notion that the U.N. is vital to U.S. interests. It is not. If the American people do not understand these things, then it is imperative that we educate them.

## End the Federal Reserve

End the Federal Reserve's control of the United States' monetary system by repealing the Federal Reserve Act. Interest rates would no longer be tampered with, as lenders and borrowers would set their own rates.
